## Predict IQ

**Introduction:** Predict IQ is an advanced analytics solution focusing on intelligent models for forecasting future trends. The system specializes in predicting market and customer behavior using advanced algorithms.

### Main Features:

- **Data Prediction:** Creating advanced forecasts based on historical data and using sophisticated predictive models.
- **Integration with Data Sources:** Ability to connect the system to various data sources to maximize forecast accuracy.
- **Machine Learning:** Advanced machine learning tools for automatic data management and analysis.
- **Customizable Dashboards:** Creation of personalized dashboards tailored to the needs of each user.

### Benefits:

- Accurate predictions
- Use of intelligent models for forecasting
- Integration with a variety of data sources
