Connectify CRM

Introduction: Connectify CRM is a professional CRM solution that integrates advanced technologies to manage customer relationships in an automated and efficient manner. The system helps businesses maintain strong connections with their customers.

Main Features:

- **Integration with Digital Systems**: Direct connection with digital advertising platforms and task management systems.
- **Automated Lead Management**: An automated system to track new leads and transfer them to the sales department.
- **Task Optimization**: A system for intelligent task management that performs optimization based on prioritization.
- **Customer Support**: Support for customers with a system for managing service calls.

Benefits:

- Automated solutions that improve efficiency
- Integration with additional digital tools
- Automated task management system
