Code Craft Pro

Introduction: Code Craft Pro is an advanced IDE (Integrated Development Environment) focused on simplifying the development process, offering smart tools to improve developer productivity.

Main Features:

- **Automatic Code Completion**: Tools for automatic code completion that simplify the work.
- **Advanced Debugging**: Smart debugging system that makes it easy to find and fix issues in code.
- **Support for Multiple Languages**: Support for various programming languages like Python, Java, C++, and more.
- **Version Control**: Tools for version management and collaboration with development teams.

Benefits:

- Comprehensive solution for efficient development
- Support for a wide range of programming languages
- Advanced debugging to improve code quality
